

Public Service Announcement

I'm Darius Rucker of Hootie and the Blowfish and this is my good friend, Sam. Sam was able to have a lifesaving bone marrow transplant because he found a donor with matching marrow. But finding a donor is hard because there are over ten thousand types of marrow tissue.

It's even harder for minorities. You see, a person is more likely to find a donor within their own race. But there aren't many minorities on the donor registry. That's why Sam and I are asking you to join. All it takes is a quick blood test. Call 1-800-MARROW-2 to find out more.

Someone like you saved Sams' life. Now you could give someone else more time. Time to live.

(Hootie's song "Time" in background. Super the phone number at bottom of screen.)
